3 Chairman's Letter

Dear Shareholder,

On behalf of the Board, I am pleased to invite those Shareholders who qualify as an "Eligible Shareholder" to participate in a pro-rata non-renounceable rights issue by the Company to raise up to a maximum of \$5,053,818.24 (including associated costs of the Offers) (**Offer**) and excluding any proceeds received as a result of the exercise of any Options.

Details of the Offer

All Shareholders who are registered with Shareholdings listed on the ASX as at 7.00 p.m. (AEST) on 16 April, 2021 (**Record Date**) and who have a registered address in Australia or New Zealand, will be entitled to subscribe of 2 New Shares for every 3 Shares held as at the Record Date. In addition, for every 2 New Shares subscribed for by an Eligible Shareholder or participant in the Shortfall, that person will be issued with 1 attaching Option, for no further cash consideration (each a **New Option**). The attaching New Options will be Quoted, with an exercise price of \$0.036 and an expiry date being the third anniversary of the date of issue of the New Options.

All Entitlements will be rounded up to the nearest whole New Share.

Eligible Shareholders are further invited to subscribe for Shortfall Shares in addition to their Entitlement of the Shortfall Offer. Subject to the terms of the Shortfall Offer, all Shortfall Shares will be placed at the discretion of the Board in consultation with the Underwriter. Please also refer to **Section 4.3** below.

The offer price payable on application for each New Share (**Offer Price**) is \$0.018, which represents a 14.7% discount to the 5-day volume weighted average closing price (**VWAP**) of Shares Quoted on the ASX up to and including 1 April, 2021 (being the last date Shares and Options traded on ASX), and being \$0.0211 per Share. That discount excludes any value that may be assigned to New Options that will attach to New Shares subscribed for. The exercise price of \$0.036 for each New Option represents a 71% premium to the 5-day VWAP of Shares Quoted on the ASX up to and including 1 April, 2021.

The Offer is currently scheduled to close at 5.00 p.m. (AEST) on 10 May, 2021 for Shareholdings listed on the ASX.

Any variation of the Closing Date will be announced by the Company on the ASX.

The Entitlements being offered under the Offer are non-renounceable. This means that your Entitlement cannot be sold and, if not taken up by the Closing Date, will lapse and thereafter be of no value.

All New Shares issued under this Offer Document (including under the Shortfall Offer) will rank equally with existing Shares (see also **Section 4.11**). The New Options will form a new class of Options in the issued capital of the Company and subject to compliance with the applicable ASX Listing Rules will be Quoted.

Underwriting of Offer

The Offer is fully underwritten by Enrizen Capital Pty Limited. The essential effect of this is that any Shortfall Shares that are not successfully applied for under the Shortfall Offer by Eligible Shareholders will, subject to the terms and conditions of the underwriting, be subscribed for by the Underwriter on

essentially the same terms of the Shortfall Offer.

The terms and conditions of the underwriting are summarised in **Section 8.2(a)**.

Purpose of the Offers

The primary purpose of the Offers is to raise capital to enable the Company to fund:

- continued exploration of the Company's existing projects in Western Australia and potential project acquisitions;
- costs associated with the Offers; and
- a portion of the Company's working capital needs.

Further information regarding the use of the funds raised under the Offer and Shortfall Offer is set out in **Section 6**.

Intention of Directors

It is the current intention, as at the date of this Offer Document, that Mr Paul Skinner who holds Shares will exercise all of his Entitlements under the Offer.

Further, the following Directors, Anthony McClure and David Morgan (each a **Sub-Underwriting Director**) have each confirmed, that they or their nominee will sub-underwrite the Offer for a collective total of \$120,000. The Sub-Underwriting Directors will not receive any payment for their commitment to be a Sub-Underwriting Director.

Actions for Shareholders

I and my fellow Directors encourage Eligible Shareholders to read this Offer Document in its entirety before making any decision as to whether to further invest in the Company. If you have any queries in relation to the Offer or the consequences of subscribing for New Shares and New Options in your particular circumstances, it is strongly recommended that you seek professional investment advice. To also assist with any of general inquiries, you may ring the Share Registry on:

- from within Australia – 1300 288 664; and
- from outside Australia - +61 2 9698 5414.

However, and to be clear, the Company Secretary and the Share Registry will not provide any investment advice in regard to any proposed subscription for New Shares or attaching New Options under the Offer or the Shortfall Offer.

If you decide to participate in the Offers, please ensure that you return your completed Entitlement and Acceptance Form, either:

- with payment of the appropriate Application Money, paid by cheque, to the Share Registry; or
- by making payment of the appropriate Application Money by BPAY® or EFT - in that regard, see **Sections 5.1, 5.2, 5.3 and 5.4**, as well as the terms of your Entitlement and Acceptance Form,

so that they are received on or before the close of the Offer, which is scheduled to occur at 5.00 p.m.

(AEST) on 10 May, 2021 for Shareholdings listed on the ASX unless extended at the discretion of the Board, after prior consultation with the Underwriter.

If you:

- are not eligible to participate in the Offer or Shortfall Offer; or
- decide not to exercise all or some of your Entitlement,

it is likely that your current percentage shareholding in the Company will, as a result of the conduct of the Offer and the Shortfall Offer be diluted. The maximum extent of that dilution is estimated to be 42.72%.

For further details on how you can deal with your Entitlement (if any), and the consequences of taking up your Entitlement or otherwise allowing your Entitlement to lapse, please refer to **Section 5**.

On behalf of the Board, I take this opportunity to thank all Shareholders for their support of the Company. The Board looks forward to your continued support in the future.

Yours faithfully,

Anthony McClure
Chairman

4 Details of the Offer and the Shortfall Offer

4.1 Overview

Subject to the provisions of this **Section 4**, the Company is making the Offer to all persons that are registered as a Shareholder, and who have a registered address in Australia or New Zealand, as at the Record Date (each an **Eligible Shareholder**).

In addition, Eligible Shareholders who wish to apply for New Shares and attaching New Options in excess of their Entitlement are invited to subscribe for any Shortfall Shares which form part of the Shortfall pursuant to the Shortfall Offer.

The Board reserves the right to issue Shortfall Shares and attaching New Options, at its sole discretion, but in consultation with the Underwriter.

For further details in relation to:

- the Offer, please refer to **Section 4.2**; and
- the Shortfall Offer, please refer to **Section 4.3**.

For details of how to apply under the Offer and the Shortfall Offer, please refer to **Section 5**.

This Offer Document, the Offer and the Shortfall Offer, if applicable and the contracts formed on acceptance of the Offer and, where applicable, the Shortfall Offer, are each governed by the laws applicable in the State of New South Wales, Australia.

4.2 Offer

The Company offers for subscription pursuant to a pro-rata non-renounceable entitlement issue to Eligible Shareholders, 2 New Shares for every 3 Shares held as at the Record Date, at an issue price of A\$0.018 per New Share. That Application Money will be payable in full and in cleared and immediately available funds, on submission of an Application.

A New Share will be classified as a fully paid ordinary share in the issued capital of the Company in accordance with the provisions of the Offer and the Constitution.

In addition, for every 2 New Shares subscribed for by an Eligible Shareholder under the Offer, that person will also be issued with 1 attaching Quoted Option (each a **New Option**), with an exercise price of A\$0.036 per New Option, for no further Application Money or any other cash consideration.

No funds will be raised from the issue of the New Options.

All Entitlements will be rounded up to the nearest whole New Share.

The maximum number of New Shares that each Eligible Shareholder is entitled to apply for under the Offer is shown in the personalised Entitlement and Acceptance Form accompanying this Offer Document. Shareholdings on different registers or sub-registers will not be aggregated in calculating Entitlements.

Based on the capital structure of the Company as at the date of this Offer Document and assuming that all Entitlements are taken up in full:

- the maximum aggregate of New Shares and attaching New Options to be issued pursuant to the Offer and the Shortfall Offer to Eligible Shareholders is:
 - 280,767,680 New Shares; and
 - 140,383,840 New Options; and
- the Offer will raise up to a maximum of A\$5,053,818 (before the costs of the Offer and Shortfall Offer, if applicable, and excluding any proceeds received as a result of the exercise of Options).¹

The purpose of the Offer and the Shortfall Offer, and the intended use of funds raised pursuant to those offers, are set out in **Section 6**.

The Offer is non-renounceable, which means that Entitlements – i.e. the right to subscribe for New Shares and attaching New Options under the Offer and the Shortfall Offer - are unable to be traded.

Eligible Shareholders should take up their Entitlement in whole or in part by no later than the Closing Date, if they wish to participate in the Offers. Otherwise, their Entitlements will lapse. If you wish to apply for New Shares under the Offer, please refer to **Section 5.1**.

The Offer is not conditional and there is no minimum dollar subscription amount.

4.3 Shortfall Offer

Any New Shares that are not the subject of a valid Application received by or on behalf of the Company on or before the Closing Date, will form part of the Shortfall and be regarded as Shortfall Shares.

The Shortfall Offer is a separate offer to the Offer made pursuant to this document and will remain open for up to the Shortfall Offer Period unless that period is closed earlier.

Only Eligible Shareholders who have exercised all their Entitlements under the Offer will be eligible and invited to apply for Shortfall Shares, and attaching New Options, at the same price as the Offer Price.

There will be no minimum dollar subscription amount of participation in the Shortfall Offer.

However:

- the allocation of Shortfall Shares and attaching New Options to Eligible Shareholders under the Shortfall Offer, in addition to all their Entitlements exercised under the Offer, will be determined at the sole discretion of the Board in consultation with the Underwriter; and
- the Board retains its discretion not to allocate Shortfall Shares and attaching New Options to an Applicant to the extent that doing so would, or in the opinion of the Board is likely to, result in a breach of the Corporations Act (by the Applicant, the Company or otherwise) or any other applicable law or would require shareholder or regulatory approval to be obtained.

Subject to the above, if the aggregate number of Shortfall Shares and attaching New Options

¹ The eligibility of Shareholders to participate under the Offer will not be determined until the Record Date, which is currently scheduled to occur at 7.00 p.m. (AEST) on 16 April, 2021. As such, in calculating this figure, the Company is assuming that all Shareholders will be regarded as Eligible Shareholders as at the date of this Offer Document.

subscribed for by Applicants is greater than the available number of Shortfall Shares, the allocation and issue of all available Shortfall Shares will be pro-rated amongst those Applicants provided that:

- no Applicant will be allotted more Shortfall Shares and attaching New Options than applied for; and
- in doing so, no breach of the Corporations Act (by the Applicant, the Company or otherwise) or other applicable law occurs or the obtaining of any shareholder or regulatory approval is required to be obtained.

As Eligible Shareholders may apply for New Shares and attaching New Options in excess of their Entitlements pursuant to the Shortfall Offer, some Eligible Shareholders may have the opportunity to increase their relevant interest in a percentage Shareholding up to an aggregate 20.0% (in total) of the total Share capital, if there is a Shortfall. However, if the Board is of the view that any allocation of Shortfall Shares or any attaching New Options to an Applicant would result in that Applicant (and its associates) holding a relevant interest in more than 20% of the total Share capital, it will only make that allocation if in doing so, the Board is of the opinion that the proposed allocation will not consequently oblige the proposed Applicant, under the laws, as primarily found in Chapter 6 of the Corporations Act, to make a takeover bid for all other Shares.

If you wish to apply for Shortfall Shares, please refer to **Section 5.2**.

4.4 Non-Renounceable Offer

The Offer is non-renounceable. Accordingly, where an Eligible Shareholder does not take up their Entitlement under the Offer, their shareholding will be diluted with no compensating cash payment. Securities not subscribed for by Eligible Shareholders will form part of the Shortfall Offer. Eligible Shareholders are encouraged to apply for any Shortfall Securities.

4.5 Underwriting

The Offer is fully underwritten by Enrizen Capital Pty Ltd.

The Underwriter has agreed to conditionally underwrite up to a maximum of 280,767,680 New Shares at the Offer Price and 140,383,840 attaching New Options (**Underwritten Securities**).

The Company has agreed to pay the Underwriter an underwriting fee equal to 6% of the total gross amount raised under the Offer. All sub-underwriting and selling fees to third parties will be met from this fee by the Underwriter. However, as stated in **Section 3, "Intention of Directors"**, no fees will be payable to any of the Sub-Underwriting Directors for their commitment to participate in the Shortfall Offer.

In addition, the Company will be required under the terms of the Underwriting Agreement, but subject to Shareholder approval being obtained, to grant to the Underwriter 20,000,000 Options on the same terms as the New Options (**Underwriter Options**).

If the Company does not obtain shareholder approval for the grant of the Underwriter Options, it must pay an appropriate alternative consideration to the Underwriter (based upon a Black-Scholes valuation of the Underwriter Options).

The Underwriter may terminate its obligations under the Underwriting Agreement in circumstances typically found in agreements of that nature, as detailed further in **Section 8.2(a)** below. The Underwriting Agreement is otherwise made on terms considered standard for an agreement of its nature.

The Underwriter is not presently a shareholder of the Company.

The Underwriter is a related party of the Company for the purpose of the Corporations Act by virtue of being controlled by Trent Franklin, who has been appointed as a Director.

Notwithstanding this relationship between the Company and the Underwriter, the Board considered prior Shareholder approval to the entry into the Underwriting Agreement (which is deemed under the Corporations Act to be the giving of a financial benefit to the Underwriter) was not required on the basis that the terms of the Underwriting Agreement are considered to be on an 'arm's length' basis.

Any Shortfall Securities issued to the Underwriter will be issued pursuant to ASX Listing Rule 10.12 (Exception 2) and accordingly, Shareholder approval will not be required for that issue. However, the issue of Underwriter Options will be subject to Shareholder approval as noted above.

4.6 Overseas Shareholders

Subject to this **Section 4.6**, neither the Offer and the Shortfall Offer is intended to, and does not, constitute an offer of New Shares or New Options in any jurisdiction outside of Australia and New Zealand.

It is not practicable for the Company to comply with the securities laws of most overseas jurisdictions in which Shareholders are located, having regard to the number of overseas Shareholders, the number and value of New Shares, Shortfall Shares, or any attaching New Options, that these Shareholders would otherwise be Entitled to and the cost of complying with regulatory requirements in each relevant jurisdiction.

Accordingly, participation in the Offer and the Shortfall Offer is not being extended, and neither any New Shares, Shortfall Shares, nor any attaching New Options, are being offered and will not be issued to, any Shareholders or, as is applicable, any other person, with a registered address which is not located in Australia or New Zealand, as at the Record Date.

Eligible Shareholders holding Shares on behalf of third parties that are resident outside of Australia and New Zealand (including nominees, custodians and trustees):

- are responsible for ensuring that its or their participation under the Offer and the Shortfall Offer, on behalf of any such third party, does not breach the laws and regulations of the jurisdiction in which that third party is resident; and
- should seek independent professional advice and observe any applicable restrictions in relation to making an Application or otherwise participating in the Shortfall Offer.

Return of a completed Entitlement and Acceptance Form or payment by BPAY® or Electronic Funds Transfer will be taken by the Company to constitute a representation that there has been no breach of any applicable foreign laws and regulations.

The Company reserves the right, in its sole discretion, to:

- reject any Application, or participation in the Shortfall Offer, that the Company believes comes from a person who is not an Eligible Shareholder or otherwise permitted to make such an Application or undertake such a participation; and
- reduce the number of New Shares and attaching New Options allocated to Eligible Shareholders, persons claiming to be Eligible Shareholders or claiming to be entitled to participate in the Shortfall Offer, if the Company reasonably considers any such claim to be false, exaggerated or unsubstantiated or likely to result in a person acquiring, through participation in the Offer or the Shortfall Offer, a relevant interest in more than 20% of all Shares on completion of the Offers.

Shareholders and any person intending to participate in the Shortfall Offer who are resident in New Zealand should consult their professional advisers as to whether any governmental or other consent is required, or whether other formalities need to be observed, to enable them to exercise their Entitlements under the Offer or otherwise participate in the Shortfall Offer.

The Offers are being made to Eligible Shareholders resident in New Zealand pursuant to the Securities Act (Overseas Companies) Exemption Notice 2013 and the Financial markets Conduct (Incidental Offers) Exemption Notice 2016.

This document has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand Law and is not required to, and may not, contain all the information that a product disclosure statement under new Zealand law is required to contain.

The distribution of this Offer Document and the Entitlement and Acceptance Form outside Australia and New Zealand may be restricted by law. If you come into possession of these documents, you should observe such restrictions and should seek your own advice about such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

4.7 Restrictions on Offer in Singapore, Hong Kong, the United States of America and Canada

4.7.1 *Singapore*

This Offer Document and any other materials relating to the New Shares, Shortfall Shares or attaching New Options being offered pursuant to this Offer Document have not been, and will not be, lodged or registered as a prospectus in Singapore with the Monetary Authority of Singapore pursuant to the Securities and Futures Act (Chapter 289 of the Singapore Statutes) (**SFA**). This Section has been included to satisfy the requirements for a "transaction specific prospectus" under section 713 of the Corporations Act. In general terms, a "transaction specific prospectus" is a document which is required to contain information in relation to the effect of the Offer on the Company and the rights and liabilities attaching to the securities offered. This Offer Document is not required to provide information regarding the Company's assets and liabilities, financial position and performance, profits and losses or prospects. This limitation on the content of this Offer Document that is required to be disclosed in respect of the Offer, is permitted on the condition that, as at the date of this Offer Document, the Company has not withheld from its continuous disclosure reporting, any information about such matters that investors and their professional advisers would reasonably require to make an informed assessment of such matters and expect to find in this Offer Document.

Information that is already in the public domain has not been reported in this Offer Document other than that which is considered necessary to make this Offer Document complete.

The Company, as a disclosing entity under the Corporations Act, states that:

- (a) it is subject to regular reporting and disclosure obligations;

4.9 Quotation of New Shares and New Options by ASX

An application for Official Quotation of the New Shares was lodged with ASX prior to the announcement of this Offer. The Company intends to apply for Official Quotation of the New Options on ASX.

No New Shares or New Options will be issued until ASX grants permission for Quotation of the New Shares subscribed for under this Offer and the Shortfall Offer. The New Shares or New Options issued pursuant to this Offer and the Shortfall Offer, are expected to be allotted and issued in accordance with the timetable in **Section 2**.

The fact that ASX may grant Official Quotation to the New Shares and New Options is not to be taken in any way as an indication of the merits of the Company, the New Shares or the New Options.

4.10 Allotment and issue of New Shares and New Options

New Shares or New Options subscribed for under the Offer and the Shortfall Offer will be allotted and issued as soon as practicable after the Closing Date, in accordance with the timetable in **Section 2**.

The Company will allot New Shares and New Options subscribed for under:

- the Offer on the basis of Applications received; and
- the Shortfall Offer on the basis set out in **Section 4.3**.

The Board retains its discretion not to allocate New Shares (including Shortfall Shares), or attaching New Options, to an Applicant to the extent that doing so would result in a breach of the Corporations Act (by the Applicant, the Company or otherwise) or other applicable law or would require shareholder or regulatory approval to be obtained.

Where the number of New Shares and attaching New Options issued to an Applicant is less than the number of New Shares applied for, the Application Money received by the Company in respect of those New Shares applied for but not issued, will be refunded, without interest, to the Applicant as soon as practicable after the Closing Date.

Pending the allotment and issue of the New Shares and attaching New Options, or the payment of any refunds, all Application Money will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company will be entitled to retain all interest that accrues on monies held in that bank account whether or not the issue of New Shares and attaching New Options takes place, and each Applicant waives the right to claim such interest.

4.11 Rights and liabilities attaching to New Shares

All New Shares issued pursuant to the Offer and the Shortfall Offer will be fully paid ordinary shares in the issued capital of the Company.

The following is a general description of the more significant rights and liabilities attaching to the New Shares. This summary is not exhaustive. Full details of the rights and liabilities attaching to New Shares are contained in the Company's Constitution, the Corporations Act and the ASX Listing Rules.

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act.

(b) Voting

At a general meeting of the Company on a show of hands, every member present in person, or by proxy, attorney or representative has one vote and upon a poll, every member present in person, or by proxy, attorney or representative has one vote for every Share held by them.

(c) **Dividends**

The New Shares will rank equally with all other issued Shares. The New Shares will participate in any dividends the Directors may determine to distribute out of the Company's profits earned from time to time.

Subject to the rights of holders of Shares of any special preferential or qualified rights attaching thereto, the profits of the Company are divisible amongst the holders of Shares in proportion to the Shares held by them. The Directors may from time to time pay to Shareholders such dividends as, in their judgment, the position of the Company justifies.

(d) **Winding up**

Upon paying the Application Monies for New Shares, a holder of New Shares will have no further liability to make payments to the Company in the event of the Company being wound up.

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the assets of the Company, and may for that purpose set such value as the liquidator considers fair upon any assets to be divided and may determine how the division is to be carried out as between the Shareholders.

(e) **Shareholder liability**

As the New Shares issued will be fully paid ordinary shares, they will not be subject to any calls for money by the Directors and will therefore not be liable to forfeiture.

(f) **Power to issue Shares**

Subject to the Corporations Act and the ASX Listing Rules, the Board may issue:

- (i) such number of Shares, in addition to Shares currently issued and the New Shares, as it determines; and
- (ii) Shares that rank, as to voting or distribution rights or both, equally with, or in priority to, any existing Shares, or the New Shares.

(g) **Transfer of Securities**

Generally, the securities in the Company will be freely transferable, subject to satisfying the usual requirements of security transfers on the ASX. The Directors may decline to register any transfer of Shares but only where permitted to do so under its Constitution or the ASX Listing Rules.

(h) **Increase of capital**

The Company may at any time and from time to time, increase the capital of the Company by the creation of additional Shares or other securities, of such amounts and of such class as it thinks appropriate.

(i) **Sale of non-marketable holdings**

The Company may take steps in respect of non-marketable holdings of Shares to effect an orderly sale of those Shares in the event that holders do not elect to retain their non-marketable holdings.

The Company may only take steps to eliminate non-marketable holdings in accordance with the Constitution and the ASX Listing Rules.

For more details of the rights attaching to Shares, investors should refer to the Constitution.

A copy of the Constitution is available for inspection, free of charge, on the Company's website at <https://www.stricklandmetals.com.au>.

4.12 Rights and liabilities attaching to New Options

The New Options will, subject to compliance with the applicable ASX Listing Rules, be Officially Quoted and will be issued on the following terms and conditions:

- Exercise Price: A\$0.036 per Option;
- Exercise Period: 3 years from date of issue.

The following is a general description of the more significant rights and liabilities attaching to the New Options. This summary is not exhaustive. Full details of the rights and liabilities attaching to New Options are contained in the Company's Constitution, the Corporations Act and the ASX Listing Rules.

For the purposes of any exercise of an Option, any fractional holding of an Option will be rounded up to the nearest whole number.

(a) **Entitlement**

Each Option gives the Option holder the right to subscribe for one (1) Share. To obtain the right given by each Option, the Option holder must exercise the New Options in accordance with the terms and conditions of the New Options.

(b) **Expiry Date**

The New Options will, except to the extent that they are exercised earlier, expire at 5:00 p.m. (AEST) on the third anniversary of the date of issue of the New Options (**Option Expiry Date**). Any New Option not exercised before the Option Expiry Date will automatically lapse on its Option Expiry Date.

(c) **Notice of Exercise**

The New Options may be exercised during the Exercise Period by notice in writing to the Company (**Notice of Exercise**) and payment of the Exercise Price for each New Option being exercised in Australian currency by electronic funds transfer or other means of payment acceptable to the Company.

(d) **Exercise Date**

A Notice of Exercise is only effective on and from the later of the date of receipt of the Notice of Exercise and the date of receipt of the payment of the Exercise Price for each New Option being exercised in cleared funds (**Exercise Date**).

(e) **Timing of issue of Shares on exercise**

Within 15 Business Days after the Exercise Date, the Company will:

- (i) allot and issue the number of Shares required under these terms and conditions in respect of the number of New Options specified in the Notice of Exercise and for which cleared funds have been received by the Company;
- (ii) if required, give ASX a notice that complies with section 708A(5)(e) of the Corporations Act (**Cleansing Notice**), or if the Company is unable to issue such a Cleansing Notice, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act, to ensure that an offer for sale of a Share issued pursuant to the exercise of a New Option does not require disclosure to investors; and
- (iii) if admitted to the Official List at the time, apply for Official Quotation on ASX of Shares issued pursuant to the exercise of the New Options.

If a Cleansing Notice delivered under sub-paragraph (e)(ii) for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company will, no later than 20 Business Days after first becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of those Shares does not require disclosure to investors.

(f) **Shares issued under exercise**

Shares issued upon exercise of the New Options will rank equally in all respects with the then issued Shares.

(g) **Quotations of Shares issued on exercise**

If admitted to the Official List at the time, the Company will apply to ASX for Quotation of the Shares issued upon the exercise of the New Options.

(h) **Variation of Share Capital**

If at any time the issued capital of the Company is reconstructed, the number of New Options and their Exercise Price shall be adjusted in such a manner as is required under the ASX Listing Rules and as the auditors for the time being of the Company advise the Directors in writing to be, in their opinion, fair and reasonable.

(i) **Participation in new issues**

There are no participation rights or entitlements inherent in the New Options and holders of the New Options will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the New Options, without first exercising those New Options.

(j) **Change in exercise price**

A New Option does not confer the right to a change in Exercise Price or a change in the number of underlying securities over which the New Option may be exercised.

(k) **Quotation**

The Company intends to apply for Official Quotation of the New Options on ASX. If the ASX does not grant Official Quotation of the New Options, the New Options will be unlisted and, as referred to in sub-paragraph (e)(ii) above, the Company will issue a Cleansing Notice that seeks to comply with the applicable provisions of the Corporations Act.

4.13 Taxation implications

The Directors do not consider that it is appropriate to give Shareholders advice regarding the taxation consequences of applying for New Shares or attaching New Options, under the Offer or the Shortfall Offer, as it is not possible to provide a comprehensive summary of the possible taxation consequences for individual Shareholders.

The Company, its advisers, officers, employees and agents do not accept any responsibility or liability for any taxation consequences arising from subscribing for any New Shares or attaching New Options, pursuant to the Offer or the Shortfall Offer. Shareholders should consult their own professional tax adviser in connection with the taxation implications of acquiring New Shares, Shortfall Shares, or attaching New Options, pursuant to the Offer or the Shortfall Offer, before making a decision as to whether to further invest in the Company.

On 16 March 2021, the Group announced its intention to withdraw from the Doolgunna project Binding Heads of Agreement with Diversified Asset Holdings Pty Ltd. At 31 December 2020, the Group had capitalised mineral exploration and evaluation expenditure of \$1,609,712 relating to this project, which was written off in March 2021. No adjustment has been made to amounts recorded at 31 December 2020 in the Interim Financial Report for the half-year ended 31 December 2020 in relation to this event.

Other than as outlined in the above table, the pro-forma consolidated statement of financial position does not include any adjustments for events occurring subsequent to 31 December 2020. Shareholders and investors should consider announcements released to the market since 31 December 2020 when evaluating the Group's movements in financial position and the effect of the Offers.

6.4 Effect on capital structure

The effect of the Offers on the capital structure of the Company, assuming all Entitlements are accepted is set out below.

6.4.1 Shares

The actual effect on the capital structure and relative ownership percentages of Shareholders, of the issue of New Shares under this Offer Document will depend on the exact number of New Shares that are subscribed for and issued under the Offer, and if applicable, the Shortfall Offer. The actual and potential dilutionary effect of the issue of New Shares and New Options on existing Shareholders who do not participate in the Offer and, if applicable, the Shortfall Offer, is (based on the assumptions and qualifications stated) outlined in **Section 6.3**.

Item	No. of Shares	% of issued capital
Shares currently on issue	421,151,521	57.27%
New Shares and Shortfall Shares ¹	280,767,680	38.19%
Incentive Shares ²	33,333,333	4.54%
Total	735,252,534	100.00%

1. Assumes full subscription under the Offers.
2. The Company has agreed to offer the Chief Executive Officer Andrew Bray a limited recourse loan of \$600,000 to acquire 33,333,333 Shares (**Incentive Shares**) at the Offer Price. The Incentive Shares will have one free attaching option for every two shares subscribed for on the same terms as the New Options (**Incentive Options**).

6.4.2 Options

Item	No. of Options
Options currently on issue	77,600,000 ¹
New Options offered pursuant to the Offer (Exercisable at \$0.036 per New Option on or before the third anniversary of the issue date)	140,383,840
Underwriter Options issued to Underwriter (Exercisable at \$0.036 per New Option on or before the third anniversary of the issue date)	20,000,000
Incentive Options	16,666,667
Consultants Options	10,000,000
Total Options on issue after completion of the Offer	264,650,507

1. Options on issue comprise of the following:

- 2,000,000 unlisted options exercisable at \$0.085 expiring 24/09/2024.

6.5 Dilutive effect on current Shareholdings

The maximum number of New Shares and Shortfall Shares which will be issued pursuant to the Offers will be 280,767,680. This will equate to approximately 38.19% of all the issued Shares following completion of the Offers and after the issue of Incentive Shares to Mr Andrew Bray the Company's new Chief Executive Officer. Subject to the extent to which current Shareholders exercise their respective Entitlements, it is possible that the relevant percentage of Shares held by Shareholders will be reduced as a result of the dilutionary effect of the proposed issue of New Shares and New Options.

By way of example, the Company provides below an analysis of the possible dilutionary effect that the Offers may have, on both:

- a wholly undiluted basis – i.e. where it is assumed that no existing Options have been or will be exercised; and
- a fully diluted basis – i.e. where it is assumed that all existing Options, New Options, Incentive Options, Underwriter Options and Consultants Options have been exercised,

and where in each of the above scenarios, it is assumed that none of the Shareholders exercise any of their respective Entitlements.

In respect of those Eligible Shareholders that exercise some (but not all) of their Entitlements, the dilutive effect of the Offer on their respective Interest in the Company will depend on the extent to which they take up their Entitlements.

(a) On an undiluted basis

Shareholder	Shareholding as at Record Date	% holding at Record Date	% holding post Offers ¹
Shareholder 1	10,000,000	2.37	1.36
Shareholder 2	5,000,000	1.19	0.68
Shareholder 3	1,500,000	0.36	0.20
Shareholder 4	400,000	0.09	0.05
Shareholder 5	50,000	0.01	0.007

1. Assumes full subscription of Offers and includes the issue of Incentive Shares issued to Andrew Bray.

(b) **On a fully diluted basis**

Shareholder	Shareholding as at Record Date	% holding at Record Date	% holding post Offers ¹
Shareholder 1	10,000,000	2.01	1.00
Shareholder 2	5,000,000	1.00	0.50
Shareholder 3	1,500,000	0.30	0.15
Shareholder 4	400,000	0.08	0.04
Shareholder 5	50,000	0.01	0.005

1. Assumes full subscription of Offers and includes the issue of Incentive Shares and Incentive Options issued to Andrew Bray, the issue of Underwriter Options to the Underwriter and the issue of Consultants Options.

Conversely, if an Eligible Shareholder takes up its Entitlement in full and subscribes for additional Shortfall Shares under the Shortfall Offer, the relative percentage Shareholding of that Eligible Shareholder will increase as a result of that subscription under the Shortfall Offer, depending on how many Shortfall Shares are allocated to that Eligible Shareholder.

6.6 Effect of the Offers on the Control of the Company

The Underwriter is not currently a Shareholder.

Pursuant to the terms of the Offers and the Underwriting Agreement, the Company and the Underwriter will ensure that no person (including the Underwriter and its Associates) will acquire, through participation in the Offers or the Shortfall Offer, a relevant interest in, or increase their holding of relevant interests to, an amount in excess of 20.0% of all Shares on issue on completion of the Offers.

The Underwriter is a related party of the Company for the purpose of the Corporations Act by virtue of being controlled by Trent Franklin, who has been appointed as a Director of the Company.

Notwithstanding this relationship between the Company and the Underwriter, the Board considered prior Shareholder approval to the entry into the Underwriting Agreement (which is deemed under the Corporations Act to be the giving of a financial benefit to the Underwriter) was not required on the basis that the terms of the agreement are considered to be 'arm's length'.

In order to mitigate the potential control effects of the Underwriting, the Company has included a Shortfall Offer, as described in **Section 4.3** above.

Notwithstanding the potential control effect of Underwriter underwriting the Offer, the Company understands that, other than as disclosed in this Offer Document and previously announced by the Company, the Underwriter has no present intention of making any significant changes to the business of the Company. These intentions are based on information concerning the Company, its business and the business environment which is known to the Underwriter at the date of this Offer Document. These present intentions may change as new information becomes available, as circumstances change or in the light of all material information, facts and circumstances necessary to assess the operational, commercial, taxation and financial implications of those decisions at the relevant time.

The allocation of Shortfall Securities under the Shortfall Offer will be at the sole and absolute discretion of the Company, in consultation with the Underwriter.

Subject to the preceding provisions, the Directors reserve the ultimate right to make allocations of New Shares, New Options and Shortfall Securities, after consultation with the Underwriter.

The Underwriter's relevant interest under several scenarios are set out in the table below:

Event	Shares held by Underwriter	Voting power of Underwriter % ¹
Date of Offer Document	0	0.0
Fully Subscribed	0	0.0
75% Subscribed by Eligible Shareholders	70,191,920	9.55
50% Subscribed	140,383,840	19.09
25% Subscribed	210,575,760	28.64 ²

1. Assumes Underwriter subscribes for all Shortfall Shares and no Shortfall Shares are allocated to sub-underwriters or third parties (including to Shareholders in excess of their respective Entitlement).
2. The Company and the Underwriter will ensure that no person (including the Underwriter and its Associates) will acquire, through participation in the Offers, the Shortfall Offer or the Underwriting Agreement, a relevant interest in, or increase their holding of relevant interests in, an amount in excess of 20.0% of all Shares on issue, on completion of the Offers.

The Company considers it is unlikely that no Eligible Shareholders will exercise their rights in respect of any part of their respective Entitlements under the Offer or apply for any additional Shortfall Securities under the Shortfall Offer. The voting power of the Underwriter and its associated entities will reduce by an amount that corresponds to the number of New Shares issued under the Offer and number of Shortfall Shares issued under the Shortfall Offer. The Directors believe that the Offer has been priced to encourage Eligible Shareholders to participate in the Offer and the Shortfall Offer, which in turn will enable the Company to achieve the objectives stated in **Section 6.1** of this Offer Document.

The Company considered alternative options for raising capital and resolved that the Offers on the terms detailed in this Offer Document, were the most favourable course open to the Company and its Shareholders, given the Company's strategic objectives and having regard to the relevant circumstances existing at the date of this Offer Document.

The Directors consider, having regard to all available options, that entering into the Underwriting Agreement with the Underwriter provides the Company and the Shareholders with the highest degree of certainty in the time available that the Offer will be successful.

6.7 Substantial Shareholders

Based on the Company's share register at the date of this Document, there is no Shareholder that has a relevant interest in Shares or voting power in the Company (**Interest**) of 5% or more.

7 Risk Factors

7.1 Introduction

Any investment carried out under this Offer Document should be considered highly speculative. Due to the nature of the Company's business activities and mineral exploration interests, making or increasing an investment in the Company carries with it risks reasonably expected of an investment in a business of this type. Applicants should read this Offer Document in full, consider all the risk factors described within it (including this **Section 7**) and all other relevant material including the Company's announcements. If an Applicant is in any doubt, or requires clarification or further additional information, that Applicant should contact their stockbroker, accountant, solicitor or other professional adviser before deciding whether to apply for any New Shares.

Additional risks are detailed below. These risk factors should not be taken as being exhaustive of the risks faced by the Company or an investment in the Company. The risk factors described below, and others not specifically referred to below, may, in the future, affect the financial performance of the Company and the value of an investment in the Company.

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially and adversely affect the financial performance of the Company and the value of the Securities offered under this Offer Document.

Therefore, no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities is given.

7.2 Key Risks and dependencies associated with the Company include:

(a) Dilution Risk

Upon completion of the Offers (assuming full subscription) and including the Incentive Shares to be allotted to Andrew Bray, the number of Shares will increase from 421,151,521 currently on issue, to 735,252,534 Shares. This means existing Shareholders may have their existing Shareholdings in the Company diluted by up to approximately 42.72%.

The Company also currently has 77,600,000 Options on issue. If the Offer is fully subscribed, the Company will issue an additional 140,383,840 New Options to Applicants under the Offers, 16,666,667 Incentive Options, 10,000,000 Consultants Options and 20,000,000 Underwriter Options. The exercise of some or all of these Options will have a dilutionary effect on a Shareholder's interest in the Company.

(b) Changes in commodity price

In the event that the Company proceeds to a production scenario, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price risk. Commodity prices (including for gold and silver) fluctuate and are affected by many factors beyond the control of the Company and the Board.

The profitability of the Company's operations is significantly affected by changes in the commodity price. Commodity prices fluctuate on a daily basis and are affected by numerous factors beyond the control of the Company.

The factors that may affect the Commodity prices include industry factors such as:

- industrial and jewellery demand;
- the level of demand for metals as an investment;
- central bank lending, sales and purchases of metals;
- speculative trading; and
- costs of and levels of global production by producers of the metals.

Commodity prices may also be affected by macroeconomic factors, including:

- expectations of the future rate of inflation;
- the strength of, and confidence in, the United States dollar, the currency in which the price of the metal is generally quoted, and other currencies;
- prevailing and anticipated interest rates and foreign exchange rates; and
- global or regional political or economic uncertainties.

The price of commodities can be subject to volatile and material price movements. Depending on commodity prices, cash flow from mining operations may not be sufficient to cover costs of production and capital expenditures. If, as a result of a decline in commodity prices, revenues from metal sales were to fall below cash operating costs, the Company may determine that it is not economically feasible to continue development and production of some or all of its current projects. This could have an adverse impact on the Company's financial performance and results of operations. The Company may curtail or suspend some or all of its exploration activities – either temporarily or permanently - with the result that depleted reserves are not replaced.

(c) Operational Risk

If the Company decides to develop and commission a mine, the operations of the Company including mining and processing may be affected by a range of factors. These include failure to achieve predicted mineral grade, mining and processing, technical difficulties encountered in commissioning and operating plant and equipment, mechanical failure, metallurgical problems, changes in operational, capital and sustaining costs, adverse or seasonal weather conditions, adverse geological conditions, industrial and environmental accidents, industrial disputes, unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment and inability to obtain or maintain any necessary consents or approvals.

(d) Regulatory Issues

Mining operations are subject to extensive regulations, including environmental, health and safety and other regulations, as well as the need to manage relationships with local communities.

The Company's exploration activities and any future mining operations are subject to extensive laws and regulations, which include laws and regulations governing, among other things exploration, development, production, exports, taxes, labour standards, mining royalties, price controls, waste disposal, protection and remediation of the environment, reclamation, historic and cultural resource

preservation, mine safety and occupational health, handling, storage and transportation of hazardous substances and other matters.

The costs of discovering, evaluating, planning, designing, developing, constructing, operating, closing and rehabilitating the Company's mines and other facilities in compliance with such laws and regulations are significant. It is possible that the costs and commonly experienced delays associated with the Company's ability to comply with such laws and regulations could become such that the Company may elect not to proceed with the development of, or continue to operate, a mine.

As part of its normal course of operating and development activities, the Company has expended significant resources, both financial and managerial, to comply with governmental and environmental regulations and permitting requirements, and will continue to do so in the future. Moreover, it is possible that future regulatory developments, such as increasingly strict environmental protection laws, regulations and enforcement policies thereunder, and claims for damages to property and persons resulting from the Company's operations, could result in additional substantial costs and liabilities, restrictions on or suspension of the Company's activities and delays in the exploration of and development of its properties.

The Company is required to obtain governmental permits for expansion or advanced exploration activities at its operating and exploration properties. Obtaining the necessary governmental permits is a complex and time-consuming process involving numerous agencies and other interested parties. There can be no certainty that these approvals will be granted to the Company in a timely manner, or at all. The duration and success of each permitting effort are contingent upon many variables not within the Company's control. The issue of governmental approvals, licenses and permits are subject to the discretion of the applicable governments or governmental officials, and any exercise of such discretion will typically take into account other parties' interests or rights.

In the context of environmental protection permitting, including the approval of reclamation plans, the Company must comply with known standards, existing laws and regulations that may entail greater or lesser costs and delays depending on the nature of the activity to be permitted and the interpretation of the laws and regulations implemented by the permitting authority. No assurance can be given that the Company will be successful in obtaining or maintaining any or all of the various approvals, licenses and permits required to operate its businesses in full force and effect or without modification or revocation. The failure to obtain or renew certain permits, or the imposition of extensive conditions upon certain permits, could have a material adverse effect on the Company's business, operations and financial condition.

Failure to comply with applicable environmental, health and safety laws can result in injunctions, damages, suspension or revocation of permits and imposition of penalties. There can be no assurance that the Company has been or will be at all times in complete compliance with all such laws or permits, that the Company's compliance will not be challenged or that the costs of complying, as well as the costs of the consequences of failing to comply, with current and future environmental, health and safety laws and permits will not materially or adversely affect the Company's future cash flow, results of operations and financial condition.

As a consequence of public concern about the perceived ill effects of mining and land development, mining companies such as the Company face increasing public scrutiny of their activities. Criticism of the Company's activities or negative publicity, whether accurate or not, could result in damage to the Company's reputation which could have a material and adverse effect on the Company's share price. The international standards on social responsibility, community relations and sustainability against which the Company benchmarks its operations are becoming increasingly stringent and extensive over time, and adherence to them is increasingly scrutinised by regulatory authorities, citizens groups and

environmental groups, as well as by investors and financial institutions.

The Company's mineral exploration and any planned development activities are subject to various federal, provincial and local government laws and regulations governing, among other things, acquisition of mining interests, maintenance of claims, tenure, expropriation, prospecting, development, mining, production, price controls, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, water use, land use, treatment of indigenous peoples, environmental protection and remediation, endangered and protected species, mine safety and other matters. Although the Company's exploration is currently believed by the Company to be carried out in accordance with all applicable laws and regulations, no assurance can be given that new laws and/or regulations will not be enacted or that existing laws and regulations will not be applied or amended in a manner that could have a material adverse effect on the business, financial condition and results of operations of the Company. By way of example only, these new laws or regulations could introduce changes to or invalidation of government mining laws and regulations, expropriation or revocation of land or property rights, changes in foreign ownership rights or changes in taxation rates. The Company is subject to changes to the royalty regimes in the jurisdictions in which it operates. The costs and delays associated with obtaining and complying with necessary licences and permits as well as applicable laws and regulations could stop or materially delay or restrict the Company from proceeding with the development of an exploration project. Any failure to comply with applicable laws, regulations or licensing and permitting requirements, even if inadvertent, may result in enforcement actions thereunder.

(e) Social Responsibilities

The Company's operations can also have an impact on local communities. Failure to manage relationships with local communities, governments and non-government organisations may harm the Company's reputation as well as its ability to bring development projects into production. In addition, the costs and management time required to identify and comply with standards of social responsibility, community relations and sustainability, including costs related to resettlement of communities or infrastructure, have increased substantially and are expected to further increase over time.

(f) Native Title

Both the Native Title Act 1993 (Cth), related State Native Title legislation and Aboriginal land rights and Aboriginal heritage legislation may affect the Company's ability to gain access to prospective exploration areas or obtain production titles. Compensatory obligations may be necessary in settling Native Title claims if lodged over any tenements acquired by the Company.

(g) Environmental

The Company's operations sometimes result in the release of hazardous materials into the environment and these releases, whether or not planned, could cause contamination. The Company may be required to investigate and remediate contamination, including at properties it formerly operated, regardless of whether it caused the contamination or whether the activity causing the contamination was legal at the time it occurred. The Company also could be subject to claims by government authorities, individuals, employees or third parties seeking damages for alleged illness, personal injury or property damage resulting from hazardous material contamination or exposure caused by its operations or sites. The Company could be required to establish or substantially increase financial provisions for such obligations or liabilities and, if it fails to accurately predict the amount or timing of such costs, the related impact on its business, financial condition or results of operations could be materially adverse.

(h) Exploration Risk

There can be no guarantee that planned exploration programs will lead to positive exploration results and the discovery of a commercial deposit or further, a commercial mining operation. By its nature the business of mineral exploration, which the Company will be undertaking, contains significant risks. By its nature, mineral exploration and production is a speculative endeavour and can be hampered by the unpredictable nature of mineral deposits, particularly with respect to predicted extrapolations to depth from known mineralisation, poor drilling techniques, incorrect grade estimates, unforeseen and adverse ground conditions, flooding, inclement weather, poor equipment availability, force majeure circumstances and cost overruns from unforeseen events. Resource estimates themselves are necessarily imprecise and depend upon interpretations that can prove to be inaccurate. Any future successful mining operation will depend on exploration success, mineral resource calculations, appropriate economic circumstances, ore reserve calculations, successful statutory planning approvals, mine design and the construction of efficient processing facilities, competent operation and management and efficient financial management.

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will also depend upon the Company having access to sufficient development capital, being able to maintain title to its exploration licences, and obtaining all required approvals for its activities. In the event that exploration programs prove to be unsuccessful this could lead to a diminution in the value of the tenements, a reduction in the cash reserves of the Company and possible relinquishment of tenements.

(i) Cost volatility and supply of Inputs

The Company is dependent on various input commodities (such as diesel fuel, electricity, natural gas, steel, concrete and cyanide) and equipment (including parts) to conduct its exploration operations. A shortage of such input commodities or equipment or a significant increase in their cost could have a materially adverse effect on the Company's ability to carry out its operations and therefore limit, or increase the cost of, exploration and any future production. The Company is also dependent on access to and supply of water and electricity to carry out its mining operations. Such access and supply may not be readily available. Market prices of input commodities can be subject to volatile price movements which can be material over short periods of time and are affected by factors that are beyond the Company's control.

An increase in the cost, or decrease in the availability, of input commodities or equipment may adversely affect the timely conduct and cost of the Company's operations. If the costs of certain input commodities consumed or otherwise used in connection with the Company's operations and development projects were to increase significantly, and remain at such levels for a substantial period, the Company may determine that it is not economically feasible to continue commercial production at some or all of its operations or the development of some or all of its current projects. Such an outcome could have a materially adverse impact on the Company's financial performance and results of operations.

(j) Minimum Expenditure Commitment

Interests in tenements in Western Australia are governed by the Mining Act 1978 (WA) and its related regulations. Each licence is for a specific term and carries with it annual expenditure and reporting

commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title or its interest in its tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

(k) Mineral Resource estimates

The Mineral Resource figures of the Company are only estimates and are subject to revision based on developing information.

The figures for Mineral Resources disclosed by the Company, including the anticipated tonnages and grades that will be achieved or the indicated level of recovery that will be realised, are only estimates and no assurances can be given as to their ultimate accuracy. Such estimates are, in large part, based on interpretations of geological data obtained from drill holes and other sampling techniques. Actual mineralisation or formations may be different from those predicted. It may also take many years from the initial phase of drilling before production is possible, and during that time the economic feasibility of exploiting a deposit may change. Resource estimates are materially dependent on prevailing commodity prices and the cost of recovering and processing minerals at the individual mine sites.

Prolonged declines in the market price of gold and/or silver may render resources containing relatively lower grades of mineralisation uneconomic to exploit and could reduce materially the Company's Mineral Resources. Should such reductions occur, material write downs of the Company's investment in mining properties or the discontinuation of development or production might be required, and there could be material delays in the development of new projects, increased net losses and reduced cash flow.

The estimates of Mineral Resources attributable to a specific property are based on accepted engineering and evaluation principles.

There are numerous uncertainties inherent in estimating quantities of Mineral Resources. The estimates are based on various assumptions relating to commodity prices and exchange rates during the expected life of production, mineralisation of the area to be mined, projected cost of mining and the results of additional planned development work. Actual future production rates and amounts, revenues, taxes, operating expenses, environmental and regulatory compliance expenditures, development expenditures and recovery rates may vary substantially from those assumed in the estimates. Any significant change in these assumptions, including changes that result from variances between projected and actual results, could have a materially adverse impact on the Company's financial performance and results of operations.

(l) Hazards and Risks

The Company is subject to hazards and risks associated with exploration and mining activities and available insurance may be insufficient to cover these risks.

The operations of the Company are subject to the hazards and risks normally incidental to exploration, development, and production activities of precious metals mining properties, any of which could result in damage to life or property, environmental damage and possible legal liability for such damage. The activities of the Company may be subject to prolonged disruptions due to weather conditions, depending on the location of operations in which the Company has interests. Hazards and risks, such as unusual or unexpected geological formations, faults and other geologic structures, rock bursts, pressures, cave-ins, flooding, pit wall failures, ground and slope failures and inventory theft, could have an adverse impact on the Company's operations. Severe weather conditions, including those resulting from global climate change, may adversely impact the Company's operations. As a result,

production may fall below historic or estimated levels and the Company may incur significant costs or experience significant delays that could have a materially adverse effect on the Company's financial performance, liquidity and results of operations.

Further, delays due to equipment malfunction or inadequacy may adversely affect the Company's results of operations. It is impossible to ensure that the current or proposed exploration programs on properties in which the Company has an interest will result in profitable commercial mining operations.

(m) Infrastructure

Mining, processing, development, and exploration activities depend, to a varying but material degree, on adequate and available infrastructure. Reliable roads, bridges, power sources and water supply are important determinants which materially affect capital and operating costs. Lack or inadequacy of such infrastructure, unusual or infrequent weather phenomena, sabotage, terrorism, government, or other interference in the maintenance or provision of such infrastructure could materially adversely affect the Company's operations, financial condition and results of operations.

(n) Land access risk

Land access is critical for exploration and evaluation to succeed. In all cases, the acquisition of prospective tenements is competitive, in which propriety knowledge or information, and the ability to negotiate satisfactory commercial arrangements with other parties, is often essential.

(o) Government policy

The availability and rights to explore and mine, as well as industry profitability generally, can be affected by changes in government policy that are beyond the control of the Company. The Western Australian Department of Mines, Industry Regulation and Safety conducts reviews from time to time of policies in connection with the granting and administration of mining leases. At present the Company is not aware of any proposed changes to policy that would affect its exploration leases or permits.

Changing attitudes to environmental, land care, cultural heritage and Indigenous land rights' issues, together with the nature of the political process, provide the possibility for future policy changes. There is a risk that such changes may affect the Company's exploration plans or, indeed, its rights and/or obligations with respect to the permits.

(p) Title

Interests in mining permits and leases in Australia are governed by the respective State Government legislation and are evidenced by the granting of tenements through the issuing of a lease or permit. Each lease or permit is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to, or its interests in, leases or permits if their conditions are not met or if sufficient funds are not available to meet expenditure commitments.

Any failure to comply with the expenditure conditions, or with the other conditions of the permit or lease, expose it to forfeiture.

(q) Force Majeure Risk

The Company's projects now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(r) Reliance on Key Personnel

The Company has a small team of Directors, executives, consultants and senior personnel. It is possible that the estimated timing and cost of the Company's future exploration plans could be dramatically influenced by the loss of existing key personnel or by the failure to retain additional key personnel as the Company's exploration program develops. The resulting impact from such loss would be dependent upon the quality and timing of the replacement of any team member.

Although the key personnel of the Company have a considerable amount of experience and have previously been successful in their pursuits of acquiring, exploring and evaluating mineral projects, there is no guarantee or assurance that they will be successful in their objectives pursuant to this Offer Document.

(s) Liquidity and Volatility

The Company has a small market capitalisation with a relatively limited number of Shareholders. As a consequence, there may be relatively few buyers or sellers of the securities in its issued capital as Quoted on the ASX at any given time and the market price may be highly volatile (particularly in times of share market turbulence or negative investor sentiment). This may present difficulties for Shareholders seeking to liquidate their holdings and for the Company, when and if seeking to raise any additional capital.

(t) Contractual Risks

As in any contractual relationship, the ability for the Company to ultimately be registered as a holder of an interest in the tenements is dependent upon the relevant vendor complying with its contractual obligations to deliver good title. To the extent that such third parties default in their obligations, it may be necessary for the Company to approach a court to seek a legal remedy. Such legal action may be costly, time consuming and no guarantee can be given by the Company that a legal remedy will ultimately be granted on appropriate terms.

(u) Financing

The Company's ability to effectively implement its business strategy over time may depend in part on its ability to raise additional funds. There can be no assurance that any such equity or debt funding will be available to the Company on terms acceptable to the Board or Shareholders, or at all. If adequate funds are not available on acceptable terms, the Company may not be able to take advantage of opportunities or otherwise respond to competitive pressures.

The Company's failure to raise capital, if and when needed, could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities and the value of the Securities.

No assurances can be given that the Company will achieve commercial viability through successful exploration and/or mining. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(v) **Competition**

The mining industry is competitive in all of its phases. The Company faces competition from other mining companies in connection with the acquisition of properties producing, or capable of producing, metals. The Company may also encounter increasing competition from other mining companies in its efforts to hire experienced mining professionals or general labour. Increased competition could adversely affect the Company's ability to attract necessary capital funding on acceptable terms, or to acquire suitable producing properties or prospects for mineral exploration in the future. Increases in copper, nickel and gold prices have in the past, and could in the future, encourage increases in mining exploration, development and construction activities, which in turn is likely to result in increased demand for and cost of contract exploration, development and construction services and equipment. Increased demand for and cost of services and equipment could cause project costs to increase materially, resulting in delays if services or equipment cannot be obtained in a timely manner due to inadequate availability, and increased potential for scheduling difficulties and cost increases due to the need to co-ordinate the availability of services or equipment. Any of these outcomes could materially increase project exploration, development or construction costs, result in project delays, or both. As a result of this competition, the Company may be unable to maintain or acquire attractive mining properties or attract better or more qualified employees or contractors.

Certain Directors also serve as directors and/or officers of other companies involved in natural resource exploration and development. There is a possibility that such other companies may compete with the Company for the acquisition of assets. Consequently, there exists the possibility for such directors to be in a position of conflict. If any such conflict of interest arises, then a director who has such a conflict must disclose the conflict to a meeting of the directors and must abstain from and will be unable to participate in discussion or decisions pertaining to the matter. In appropriate cases, the Company will establish a special committee of independent directors to review a matter in which several directors, or management, may have a conflict.

(w) **Coronavirus (COVID – 19)**

The outbreak of COVID-19 is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

The Directors continue to monitor the outbreak of COVID-19 closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore unavoidably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to any impact of COVID-19 on the Company. If any of these impacts appear material prior to the close of the Offers, the Company may elect to notify investors under a supplementary prospectus.

7.3 General Risks

A summary of the major general risks are described below:

(a) **Share Market Risk**

There are a number of factors (both domestic and international) that may affect the market price of Shares and Options and neither the Company nor its Directors may have control over any such factors. The market price of Securities can be expected to rise and fall in accordance with general market

conditions and factors specifically affecting the Australian resources sector and exploration companies in particular.

Neither the Company nor the Directors warrant the future performance of the Company or of any Shares or Options, including any Securities, or any return on an investment in the Company.

(b) Insurance

Available insurance does not cover all the potential risks associated with a mining company's operations. The Company may also be unable to maintain insurance to cover insurable risks at economically feasible premiums, and insurance coverage may not be available in the future or may not be adequate to cover any resulting loss.

Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration and production is not generally available to the Company or to other companies in the mining industry on acceptable terms. As a result, the Company might become subject to liability for environmental damage or other hazards for which it is completely or partially uninsured or for which it elects not to insure because of premium costs or other reasons.

(c) Global Financial Conditions

Global financial conditions have been characterised by increased volatility. Although there has been some recovery, there is no certainty that the disruptions and their effects have ended and will not continue to affect the markets. These factors may impact the ability of the Company to obtain equity or debt financing in the future on terms acceptable to the Company or at all. Any or all of these economic factors, as well as other related factors, may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. If such increased levels of volatility and market turmoil continue, the Company's operations and the trading price of the Shares and/or Options, may be materially adversely affected.

Securities of mining companies have experienced substantial volatility, often based on factors unrelated to the financial performance or prospects of the companies involved. These factors include macroeconomic developments in the countries where the Company carries on business and globally, and market perceptions of the attractiveness of particular industries.

(d) General Economic Conditions

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that economic climate include the general level of economic activity, interest rates, foreign exchange rates, inflation, supply and demand, industrial disruption, investor sentiment toward particular market sectors, terrorism or other hostilities and other economic factors. The price of commodities and level of activity within the mining industry will also be of particular relevance. These factors are beyond the control of the Company and the Board, and neither the Company nor the Board gives any forecast or prediction, with any degree of certainty, as to how they will impact the Company or any Shares or Options.

(e) Legislative Change

Changes in government regulations and policies may adversely affect the financial performance or the current and proposed operations generally of the Company.

(f) **Exchange Rate Risk**

The revenues, earnings, assets and liabilities of the Company may be exposed adversely to exchange rate fluctuation. Whilst the Company currently raises all of its funds in Australian dollars and all services are paid for in Australian dollars, commodities are frequently traded in US dollars or other foreign currencies, on international markets. As such in a production off-take scenario, the Company in the future may be exposed to exchange rate fluctuations.

(g) **Industrial Risk**

Industrial disruptions, work stoppages, safety issues and accidents in the course of the Company's operations could result in losses and delays, which may materially and adversely affect profitability.

(h) **New Options**

The New Options attaching to the New Shares offered under this Document will be Quoted on the ASX. As with all Options, there is a risk that the value of the Shares will not equal or exceed the exercise price of the Options prior to their expiry date, meaning the Options would expire on that date with no value.

(i) **Investment Risk**

The Securities offered pursuant to this Offer Document should be considered highly speculative due to the nature of the Company's business. There is no guarantee as to payment of dividends, return of capital or the market value of any of the Securities. In particular, the prices at which an investor may be able to trade any of the Securities may be above or below the price paid for them.

(j) **No profits to date**

The Company has incurred losses since its inception. It is therefore not possible to evaluate its prospects based on past performance. Since the Company intends to invest in its exploration and development programs, the Directors anticipate making further losses in the foreseeable future. While the Directors have confidence in the future revenue earning potential of the Company, there can be no certainty that the Company will achieve or sustain profitability or achieve or sustain positive cash flow from its operating activities.

(k) **Litigation**

Legal proceedings may be brought against the Company, its subsidiaries or affiliated entities or their respective officers, directors, employees or agents for example, being litigation based on its business activities, environmental laws, tax matters, volatility in its stock price or failure to comply with its disclosure obligations, which could have a material adverse effect on the Company's financial condition or prospects. Regulatory and government agencies may bring legal proceedings in connection with the enforcement of applicable laws and regulations. As a result, the Company may be subject to expenses of investigations and defence, and fines or penalties for violations if proven. The Company may also potentially incur cost and expense to remediate, increased operating costs or changes to or cessation of operations, if ordered to do so or required in order to resolve such proceedings. In the event of a dispute arising at the Company's foreign operations, the Company may be subject to the exclusive jurisdiction of foreign courts or may not be successful in subjecting foreign persons to the jurisdiction of the Company's preferred choice. The Company's inability to enforce its rights could have an adverse effect on its future cash flows, earnings, results of operations and financial condition.

(l) **Taxation**

The holding or disposal of the any Securities will have tax consequences which may differ depending on the individual financial affairs of each holder of such Security. All of holders of Securities are urged to obtain independent financial advice about the consequences of holding or disposing of any of those Securities from a taxation viewpoint and generally.

(m) **Other**

Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of the Company.

The above factors, and others not specifically referred to above, may in the future materially and adversely affect the financial performance of the Company and the value of the Securities. Therefore, the Securities to be issued pursuant to this Offer Document carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

8 Additional Information

8.1 Share performance

The issue price at which the New Shares are being offered under this Offer Document represents a discount to a range of historical trading prices of the Company's Shares. Further, the quoted discount percentage excludes any value that may be assigned to New Options that will attach to New Shares subscribed for.

Specifically, the Offer Price of \$0.018 per New Share represents a 14.7% discount to the closing price of Shares on the ASX on 1 April, 2021 (being the last date the Company's Shares traded), being the 5-day VWAP of \$0.0211 per Share.

The highest and lowest traded prices of Shares on the ASX in the 12 months prior to the date of this Offer Document are as follows:

	Price ASX	Date ASX
Highest	A\$0.135	22 October 2020
Lowest	A\$0.01	14 April 2020

8.2 Material Contracts

The following are summaries of the significant terms of the material agreements which relate to the Offer:

(a) Underwriting Agreement

In accordance with the provisions of the Underwriting Agreement dated on or about 12 April 2021 between the Company and the Underwriter (**Underwriting Agreement**), the Underwriter has agreed to conditionally underwrite the Offer to Eligible Shareholders to subscribe for 280,767,680 New Shares at the Offer Price and 140,383,840 attaching New Options for no further cash consideration.

The provisions of the Underwriting Agreement evidence that the Company has agreed to:

- pay the Underwriter an underwriting/issue management fee equal to 6% of the total gross dollar amount raised under the Offer. All sub-underwriting and selling fees to third parties will be met from this fee by the Underwriter; and
- subject to Shareholder approval being obtained, grant to the Underwriter 20,000,000 Options on the same terms as the New Options (**Underwriter Options**). If the Company does not obtain shareholder approval for the grant of the Underwriter Options, it must pay an appropriate alternative consideration to the Underwriter (based upon the Black-Scholes valuation).

The Company may, subject to Shareholder approval if necessary, pay some or all of the Underwriting Fees in Shares and/or Options effectively on the same terms as the Company is offering to issue New

Shares and Shortfall Shares under the Offers. However, the Company confirms that the Underwriting Fees will not be paid in Shares to the Underwriter where the issue of Shares would result in the Underwriter acquiring a relevant interest exceeding 20.0% of the voting power in the Company.

The Company has also agreed to pay all reasonable costs and expenses of the Underwriter incidental to the Offers (including the Underwriter's legal expenses).

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Shares or Options issued to them under this Offer Document. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.
